

NAD+
Skin Booster

reveren

What is NAD+?

NAD+ is a natural coenzyme in all human cells, essential for cellular energy and repair.

Replenish your skin's NAD+ levels with Revergen®

Activate sirtuins for cellular renewal and balance.

Boost collagen to improve firmness, elasticity, and skin texture.

Inhibit MMP-1 to slow wrinkle formation.

Preserve youthfulness by preventing skin from sagging, fine line, and loss of resilience.

Awaken Your Inner Glow

NAD+ Skin Booster

Experience cellular reversal by recharging your cells with natural molecules.

- Pharmaceutical-grade NAD+
- Trusted by Harvard Medical School
- GMP-certified manufacturing

* Lyophilized NAD+ Vial 100mg

* Dilutant Vial 4mL

True beauty starts within your biology. Revergen® restores your skin's rhythm and renews—cell by cell.

“NAD+ decline plays a critical role in the biology of skin aging.”

SUBJECT A

Improvement in Fine Wrinkles

“After 4 weeks with two sessions of Revergen[®], fine wrinkles were reduced by 25% on average.”

—Dr. Jung Hwan Kim, Dr. Evers Clinic (Myeongdong, Seoul)

SUBJECT B

Brightness Improvement

“Skin brightness improved by 78% after two sessions of Revergen[®]”

—Dr. Jung Hwan Kim, Dr. Evers Clinic (Myeongdong, Seoul)

FAQ

Q1. What makes Revergen® different?

Unlike traditional HA or PDRN boosters that work on surface hydration or tissue support, Revergen® uses biocompatible NAD+ to stimulate skin renewal from the cellular level.

Q2. What is NAD+ and why does it matter for skin?

NAD+ is a natural coenzyme found in all cells. It powers regeneration, DNA repair, and energy metabolism. As we age, NAD+ declines—Revergen® replenishes NAD+ directly into the skin.

Q3. Is Revergen® safe?

Yes. Revergen® is formulated with biocompatible molecules already found in the body. It is produced in a GMP-certified facility.

Q4. Who is Revergen® for?

Anyone seeking natural, gradual skin rejuvenation, especially for early aging signs.
